- French
- English
- Arabe

PROFILE

My name is Zakaryae Rouane, I am 19 years old and living in Meknes. I am a full stack web developer and I have just graduated from OFPPT in web development. During my training, I had a number of real-world projects that allowed me to be an expert in new web technologies. In February, I completed a remote internship with OSI Software in Rabat, where I gained working experience in a professional environment. Curious and always interested in digital technology and its latest trends, I am now prepared for new professional challenges and to contribute my skills to novel projects.

PROFESSIONAL EXPERIENCES

- **INTERNSHIP AT YONETWORK**
Company: Yonetwork, MEKNES – July – August 2025
Internship: Employee attendance management app with QR code
 - Developed a full-stack web application using React for the frontend and Laravel for the backend, connected through RESTful APIs.
 - Implemented features for employee attendance tracking, QR code scanning, and employer management.
 - Gained practical experience collaborating in a remote team using Git and GitHub, following professional development workflows.
- **INTERNSHIP AT OSI SOFTWARE**
Company: OSI Software, Rabat - February – March 2025
Web development using React and Laravel
Here's what I learned:
 - Collaborating in a remote development team using professional tools like Git and GitHub
 - Building full-stack features with React on the frontend and Laravel on the backend
- **DOCSAURA PROJECT**
2025
Development of a web application to schedule medical appointments – Docsaura
Development and design of a platform allowing patients to:
 - Sign up for an account and book appointments online with doctors
 - Check availability, cancel or reschedule appointment
 - Receive confirmation or reminder messages
 - Smooth, new, and responsive UI Technologies utilized: React.js (front-end), Laravel (back-end), MySQL
- **CHAT HUB PROJECT**
2024
Development of a simple and efficient messaging application:
 - Real-time messaging
 - Contact management (add and remove friends)
 - User experience optimized through a minimalist interfaceTechnologies used: HTML, CSS, JavaScript, PHP, MySQL
